URS Table Number	General Notes
5A, 6 & 16	<p>For the 2015 URS data, we updated our methodology to more accurately identify those clients who were served by the Division of Behavioral Health Services for FY 2015. The Division previously identified clients as those with an open episode of care (EOC) in our demographic data set. The Division has experienced difficulty in identifying currently served clients by EOC due to data submission lags. The updated methodology used this year identifies clients by selecting those who were enrolled in behavioral health services in our state Medicaid agency (AHCCCS) and those who have had an encounter (service) within the reporting period. We believe that the updated methodology resulted in changes in reported data between 2014 and 2015. While the majority of clients would remain the same, it may have included clients that were not included before and also dropped some clients with outdated data, therefore may have created a shift in some of our numbers.</p>
10	<p>The URS tables are reported on a state fiscal year for all grant activity during that period. Magellan's contract ended March 31, 2014 and the close out process of a contractor requires that all financial adjustments be made before final close out. This could happen in subsequent state fiscal years; therefore, all grant adjustments will continue to be reported until the close out is complete. The negative amount reflects a recoupment of FY2014 profit corridor that affected the block grant during that fiscal period. The funds were recouped from the contractor because they were in excess of their allowable profit, per the terms of their contract.</p>
